

AISATS BLR re-certified with TAPA Certificate!

AISATS Air Freight Terminal in BLR has been re-certified with “**TAPA FSR 2014 Class A**” certification. This makes AISATS BLR, **the 1st Air Cargo Terminal Operator in India** to have a warehouse facility certified for “TAPA FSR 2014 Class A” standards. The certification is considered to be the highest degree of warehouse security in comparison with the other Class B or Class C standards.

Back in 2012, AISATS Air Freight Terminal had received its 1st TAPA certification and AISATS was the 1st Airport Service provider to receive such certificate not only in India but also in IMEA (India, Middle East & Africa) region. Re-certification of TAPA certificate ensures consistency in adherence to highest security standards for its warehouse operations.

TAPA Audit is conducted on various

parameters like perimeter security, facility’s various tight access controls, secure handling of high value products, high tech equipment for cargo handling, installation of vital surveillance and alarm systems, safe and secure freight handover process and work force integrity.
