

## AISATS BLR receives TAPA FSR 2017 Class A certification !

AISATS BLR has received **Transported Asset Protection Association (TAPA) Facility Security Requirements (FSR) 2017 Class A** certification for the warehouse security for its cargo operations at Air Freight Terminal and at AISATS COOLPORT located at Kempegowda International Airport, Bengaluru. The FSR 2017 has much more stringent security parameters as compared to FSR 2014. This makes AISATS BLR the **1<sup>st</sup> Indian Air Cargo Terminal** to be TAPA FSR 2017 Class A certified.

TAPA is known for its strict evaluation criteria for certifying a cargo facility to FSR Class A standards. This highest accreditation is accorded to a warehouse for its security after carrying out thorough audits/inspections of the warehouse operations. The security processes followed at AISATS' warehouse such as stringent access controls, secure handling of high-value products, high-tech equipment for cargo handling, installation of vital surveillance and alarm systems are in line with the set standards of the auditing body.

Security requirements for TAPA FSR 2017 Class A Certification are also in conformance and compliance to the Safety Management System of AISATS. This certification assures highest level of security of cargo during its warehousing and respective handling at AISATS BLR facilities.
